MY STACK

The 9 AI tools I rely on

What each one does, and why I like it.

SWIPE ››

01 / 09

Claude

AI chatbot. I use it to think through ideas, draft copy and work through tasks.

> WHY I LIKE IT
>
> **It remembers our business context through Projects and connects to Gmail, Calendar and Drive.**

02 / 09

Granola

Note taking. It writes up my meetings so I can stay in the conversation.

> WHY I LIKE IT
>
> **No bot joins the call, and I get the notes afterwards.**

03 / 09

Wispr Flow

Voice transcription. I speak and it types, in whichever app I am using.

> WHY I LIKE IT
>
> **Talking is faster than typing, and it tidies up what I say.**

Claude Code

Coding. Where we build our own tools and automations.

WHY I LIKE IT

We built our daily content routine with it, from plain-English prompts.

05 / 09

Higgsfield

Media generation. Images and video in one place.

WHY I LIKE IT

We use it for animated clips and our character images, including Kai.

06 / 09

ElevenLabs

Text to voice. It turns a script into a natural voiceover.

> WHY I LIKE IT
>
> **British voices that sound like a person, not a robot.**

07 / 09

Zernio

Social media scheduling. One place to post to LinkedIn, Instagram, TikTok and X.

> WHY I LIKE IT
>
> **One request publishes everywhere, and I can check each post landed.**

n8n

Automation. It connects our tools with no code.

WHY I LIKE IT

It runs our website and Google Business publishing and our spreadsheet updates.

09 / 09

Calendly

Booking. How people book a call with us.

WHY I LIKE IT

A free 30 minute AI audit is a few taps away.

9 tools.
One stack.

These are the ones we lean on every week. Want help choosing yours? We offer a free 30 minute AI audit.

Which tool in your stack could you not drop?
